The bottom of the image has a red gradient overlay.

# Our Mission

## Hollister Incorporated Mission Statement

Hollister dedicates itself to be a company which looks outward to the needs of healthcare professionals and the people they serve.

This dedication is based on our mission: to help healthcare professionals deliver better products and services, and to make life more rewarding and dignified for those who use our products.

By listening to our customers and those they serve, we will gain a better understanding of the needs which we can best satisfy.

We will work together by focusing on the process of filling these needs, through cooperation, effort, and creativity.

We will form strong relationships with our suppliers and distributors, and with the communities in which we work.

We will judge behavior in every phase of our business by how it helps us better serve our customers.

We believe that the ethical way is the only way to conduct our business.

Hollister has the unique advantage of building on the solid foundation of “quality products, quality service, quality employees,” a legacy of our founder, John Dickinson Schneider.

We are pledged to maintaining an independent company—employee-owned—and, to that end, will continue to manage our company as an internally financed and profitable business.

---

By living each day by our mission, we will grow and prosper as a company and in the process, become better human beings.
